

Blue Texas!

Vinyl Decal has 3 layers: Paper Backing (back), Blue Vinyl (Texas) and Transfer Tape (front).

1. Clean glass (exterior) surface thoroughly.
2. Remove white paper backing. Blue vinyl decal will stay adhered to transfer tape (front). *Note: Back of exposed vinyl has adhesive.*
3. Position blue vinyl decal above surface, then carefully apply one edge, smoothly roll decal onto surface to minimize bubbles.
4. Use a credit card or something similar to smooth out decal and firmly adhere.
5. Carefully remove transfer tape (front) by pulling back across itself at an angle.
6. Smile! We're in this together!
